UX Foundations: Content Strategy

Tuliany Grande

Frontend Developer | Agile Evangelist

Marbellaområdet

Sammanfattning

As a front-end developer I believe in crafting meaningful digital experiences. My toolkit, packed with expertise in Next.js, Tailwind, SASS, Git, API, JSON, and CI/CD pipeline, enables me to bring creative solutions to life.

My engagements with previous projects have been incredible journeys of growth and learning, demonstrating my adaptability and commitment to impactful tech solutions.

While my professional accomplishments narrate one story, my personality adds another layer to it. I pride myself on being a strategic thinker, always looking for efficient ways to tackle challenges. Rather than leading from the front with a loud voice, I believe in setting an example through my work, dedication, and approach to problem-solving.

I thrive when surrounded by innovation and progress, and I continually seek opportunities to learn and adapt. In this ever-evolving tech landscape, I stand ready to contribute, collaborate, and drive change – not by dictating, but by demonstrating.

Erfarenhet

MedHelp Care

Frontend Developer

april 2024 - Present (2 år 6 månader)

amaceit

Frontend Developer

oktober 2022 - mars 2024 (1 år 6 månader)

Stockholm, Stockholm County, Sweden

In my current role at Amaceit, I've had the opportunity to work on two remarkable projects. One with GotlandsHem, a municipal housing company,

where I applied my technical acumen to enhance community-driven housing solutions. The other with FMV, a vital provider of materials and services to the Swedish defense, where I played a role in complex system integrations and procurement for national defense.

- Gitlab
- Figma
- JSON
- CI/CD pipeline.

Campcation

Frontend Developer

december 2021 - juni 2022 (7 månader)

Stockholm, Sverige

Campcation is a specialized comparison platform, akin to Airbnb, specifically tailored for camping accommodations and experiences.

Over a six-month period, I worked as a frontend developer in a dynamic, fast-paced environment, focusing on creating and implementing visible and behind-the-scenes features for the platform. This experience provided me with invaluable insights and allowed me to contribute significantly to the project's success.

- React (Gatsby) - Amplify
- Dynamo

iZettle

Frontend Developer

november 2020 - maj 2021 (7 månader)

Stockholm, Sverige

During my internship, I've been building a Data Catalog for Zettle by Paypal: Alexandria.

The purpose of Alexandria is to simplify the process of finding, discovering, and inventorying data assets. The data catalog is built with an API from the Google Cloud Data catalog. And the stacks used for it are Node.js, React, Typescript and Next.js.

Today Alexandria is improving efficiency in :

- * Time and effort on finding and accessing data.
- * Understanding of business vocabulary
- * Structuring data
- * Making data and knowledge reusable.

These months have been a great pleasure for me, I'm learning so much technically and I have the best team members that have invested so much in me and my technical growth.

Inspodden

Podcast host

februari 2017 - december 2019 (2 år 11 månader)

Stockholm, Sverige

After the hard-working years as a Real estate agent, I burned out. I took a year off from work and traveled the world and started a journey in personal development.

But since I'm an entrepreneur, I couldn't sit for very long and started a podcast with a friend. This podcast was an excuse for me to meet inspiring people and share their knowledge and how to handle life, stress, and business with friends and co-workers. It soon became one of Swedens top 100 podcasts in its field, personal development.

Fastighetsbyrå

Real Estate Agent

augusti 2014 - augusti 2016 (2 år 1 månad)

Solna

Swedish real estate market is regulated and to become a Real Estate Agent, you have to study law, marketing, and economics at the university level. Once I was done studying, I wanted to work with the best, and therefore I applied for a job at Fastighetsbyrån. During the years I studied, Fastighetsbyrån had become a sought after employer because it was leading in the real estate market at that time.

After my first interview at the Fastighetsbyrån HQ, I landed a job at the best selling office. Our team was leading in sales during the whole period I worked there. These years at Fastighetsbyrån, Solna was vital in my career and personal life because it was during those years I learned about determination and stamina and also the place where I found friends for a lifetime.

Rio Ambassadors AB

Event Manager

april 2013 - december 2014 (1 år 9 månader)

Rio de Janeiro , Brasilien

During the years that I was studying at university to become a real estate agent in Stockholm, I also started my very first own company. Brazil had been chosen to be the host country of the world cup 2014 and me and my cousin started to see a high demand for guides that could offer something more than the usual touristic experience of Rio.

Therefore we started up Rio ambassador with guides that were fluently in English, Swedish, and Portuguese. We gave our costumers a real Carioca experience, with fine dining at zona sul and Sunday pagode at the more peaceful neighborhoods of Rio. Visits to the headquarters of the Brazilian swat-team BOPE and the most dreamy deserted beaches that only a real carioca would know.
